

# THE RIGHT STAPLER FOR THE JOB. EVERY TIME.

Unique challenges call for unique solutions, our portfolio of specialty reloads help you to overcome surgical challenges.

## TRI-STAPLE™ 2.0 CURVED TIP RELOAD

The first curved tip stapler enhances visualisation and maneuverability while allowing for blunt dissection<sup>1</sup>

## TRI-STAPLE™ 2.0 30 MM RELOAD

Designed specifically for use in situations where space is limited

## TRI-STAPLE™ 2.0 BLACK RELOAD

Designed specifically for use in extra-thick tissue applications, and offers a 50% thicker tissue range compared with the Echelon Flex™™ green reload<sup>2</sup>

## TRI-STAPLE™ 2.0 RADIAL RELOAD

Provides access 1 to 2 cm lower in the pelvis compared with Ethicon Contour™™ facilitating better distal margins<sup>3</sup>

## TRI-STAPLE™ 2.0 REINFORCED RELOAD

The only stapler with preloaded tissue reinforcement to provide improved ease of use, reducing errors and waste in the OR<sup>4</sup>

## WE'RE PUTTING INFORMATION IN YOUR HANDS.

With real-time feedback

Tri-Staple™ 2.0 reloads are intelligence-enabled — that's what the "i" on our new loading units signifies. It means there's a computer chip in them that can communicate significant information during your procedure.

The Signia™ stapler used with Tri-Staple™ 2.0 reloads gives you more information than ever before about the relationship between the reload and the tissue, helping to guide your clinical decision making.

## HANDLE COMPATIBILITY TODAY AND TOMORROW

Tri-Staple™ 2.0 reloads fit our existing portfolio of staplers including the Endo GIA™ Ultra and iDrive™ Ultra powered stapler, but it's when paired with the Signia™ stapler that you get optimal stapling performance.<sup>5</sup>

# PUT THE FUTURE OF STAPLING IN YOUR HANDS — **TODAY.**
